EDUCATION

SRM UNIVERSITY

B.Tech Computer Science GPA: 9.39

Chennai, TamilNadu

Sep 2022 - May 2026

EXPERIENCE

Evo Astra Ventures .pvt.ltd

Data Science Intern

Hyderabad, India

Oct 24 – Dec24

- Built a predictive model to forecast term deposits for 45,000+ clients of Banco de Portugal using client demographics and campaign data.
- Explored data to identify trends and handle missing values, improving performance
- Assessed features and excluded variables like contact duration, achieving 90% model accuracy.
- Evaluated classification using metrics such as accuracy, precision, recall, and F1-score, with scores reaching 70%.

ACM INDIA

Vice Chair ACM SIGKDD STUDEN CHAPTER

Chennai

April 2024 - March 2025

- Achieved a 90% increase in member engagement and enhanced leadership and team collaboration skills.
- Conducted analysis on model performance, identifying key improvements in prediction accuracy, contributing to the chapter's research progress. Increase of project and research conduction by 70%

SKILLS

Programming Languages:	C++(Adv),Java(Int) , JavaScript
Web Framework:	ReactJs, NextJs, Node.js, Recoil, Zustand,
Data Science & Machine Learning:	Supervised Algorithms, Generative AI, Transformers, LLMs
Version Control:	Git, GitHub, Visual Studio Code, Ubuntu OS, Windows
Mathematical & Statistical Tools:	Microsoft Excel, PowerBi(Beginner)
Research Skills:	Planning, Collaboration, Communication, Team Leadership
Core Subject:	Data Structures ,Operating System ,DBMS, Software Engineering

PROJECTS

Livelihood Management Platform CML NGO | JP Morgan Chase | June 2025- July 2025

- Built a **full-stack web platform for managing 10+ livelihood initiatives**, streamlining training for 500+ women farmers across Assam.
- Engineered **form-based data entry with validation, reducing manual entry errors by ~80%** and ensuring secure, redundant-free storage in a normalized database.
- Designed multivisual **NGO dashboard** with real-time analytics on crop yields, training progress, and regional participation, **reducing reporting time by 70%**.
- Implemented **Twilio SMS** notifications, enabling communication with farmers in low-connectivity regions, improving message delivery success by 85%.

Derma Scan | Smart India Hackathon | October 2023 - December 2023

- **Implemented MobileNetV2 to classify skin lesions with 90% accuracy.**
- Developed a **friendly user interface** for seamless integration with the trained model, ensuring enhanced accessibility and ease of use ,used **Large Language Models (LLM)** to analyze user queries, providing real-time connectivity between users and local doctors for effective medical assistance.

FlowMate | Software Development Project | February 2025 - May 2025

- Developed and maintained a menstrual health and wellness app focused on cycle prediction, symptom tracking, and personalized insights, reaching over 1,200 active users during beta testing.
- Used **Agile Methodology** and conducted various sprints enabling scrum procedures while development.
- Designed a responsive **UI using Material UI and Next.js**, improving mobile user experience and reducing **bounce rate by 38%**.
- Implemented a real-time calendar and charting system using Chart.js, enabling users to visualize period cycles, ovulation windows, and mood patterns across months.
- Integrated **Firebase Authentication and Firestore** to ensure secure, scalable storage and data privacy compliance for 3,500+ health logs.
- Added reminder notifications for period and medication tracking, increasing daily user engagement by **45% within four weeks.**
- Collaborated with a **4-member cross-functional** team to drive timely feature rollouts and testing.
